## AHD Dual Camera in White

» Also available in D1 standard

### » PRODUCT OVERVIEW

CKO's Dual Camera with night vision (IR) is designed and built specifically for motorhomes and horse boxes, providing high-quality footage with differing lens angles and positions for greater coverage. It is ideal to set-up this camera as a rear-view mirror, as the image that looks backwards is displayed constantly on the monitor.

When the vehicle is triggered for reverse, the camera lens switches to the alternative image, which looks predominantly down at the rear of the vehicle - providing a much improved reverse image for safe manoeuvring. A U-Bracket for mounting the camera, and a sun visor is **included** in this kit.

### » SPECIFICATIONS

<b>Dimensions</b> (including mount)	104mm(W) x 66mm(D) x 97mm(H)
<b>Operating Voltage</b>	12V DC
<b>Power Consumption</b> (on)	300mA max
<b>Power Input</b>	Via 4-Pin Aviation Connector
<b>Connection Type</b>	2x 4-Pin Aviation
<b>Resolution</b>	AHD 720P
<b>TV System</b>	PAL
<b>Operating Temperature</b>	-30°C to +70°C
<b>Operating Humidity</b>	<95% RH
<b>IP Rating</b>	IP67
